STEPS FOR RETROACTIVE COMPLIANCE 
with the NIH PUBLIC ACCESS POLICY

1. Confirm that the work is in a National Center for Biotechnology Information (NCBI) My Bibliography account belonging to an author or a Principal Investigator (PI) before starting the retroactive compliance process. Login using your eRA Commons account linked to your NCBI My Bibliography account. 
   http://www.ncbi.nlm.nih.gov/books/NBK53595/ 
   (See also NIH Public Access Policy Compliance: Home from Duke University Medical Center Library & Archives)

2. Does the National Institutes of Health (NIH) Public Access Policy apply to the work? 
   Yes to all three criteria means that the NIH Public Access Policy applies to the work in question.

   | The NIH Public Access Policy applies to any manuscript that:                              | TIP: Copy and paste the PMID into the PMID-PMCID Converter tool (http://www.ncbi.nlm.nih.gov/pmc/pmcptopmid/) to see if the work has a NIHMSID or a PMCID. (The Converter tool is often updated sooner than PubMed.) |
   | 1. Is peer-reviewed;                                                                  |                                                                                           |
   | 2. And, is accepted for publication in a journal on or after April 7, 2008;           |                                                                                           |
   | 3. And, arises from:                                                                 |
   |     • Any direct funding from an NIH grant or cooperative agreement active in Fiscal Year 2008 or beyond, or; |                                                                                           |
   |     • Any direct funding from an NIH contract signed on or after April 7, 2008, or;    |                                                                                           |
   |     • Any direct funding from the NIH Intramural Program or an NIH employee           |                                                                                           |

3. IF NOT APPLICABLE, note N/A in My Bibliography using the “Edit Status” function. See Managing Compliance with the NIH Public Access Policy Using My Bibliography. 

4. IF THERE IS NO NIH Manuscript Submission System ID (NIHMSID) OR PubMed Central ID (PMCID) (or if the work is not found in PubMed), check the Submission Method A list (http://publicaccess.nih.gov/submit_process_journals.htm) to determine if the work was published in a Submission Method A journal. 
   a. If yes, confirm that the journal was a Submission Method A journal at the time of publication by checking the Start and End Date columns. If confirmed, use ‘PMC Journal – In Process’ as documentation of compliance and send an email to the NIH Policy Help Desk (PublicAccess@nih.gov) notifying them of the lack of a PMCID. Include the full citation including the PMID in the email.

5. If no, the work was not published in a Submission Method A journal, find the journal policy for NIH-funded authors for each journal: 
   a. Determine if the work was published in a Submission Method B, C or D journal by checking the lists provided by NIH at http://publicaccess.nih.gov/submit_process.htm, OR 
   b. On each journal’s website, look for “Instructions for Authors,” “Copyright information,” or any other section that might provide information about copyright policies for NIH-funded authors for that specific journal. If no information is provided, authors may need to contact the journal for clarification.

6. If the journal is a Submission Method C journal (author submits), the responsible author* should self-submit the work to NIHMS or assign a third party to submit the work. See NIHMS Frequently Asked Questions (FAQs) (http://www.nihms.nih.gov/help/faq.shtml) for guidance on submitting the work to NIHMS (http://www.nihms.nih.gov).

   * The corresponding author is not always responsible for submitting the final peer-reviewed manuscript to the NIH Manuscript Submission (NIHMS) system. When in doubt, check with the responsible grantee or Principal Investigator.

-over-
7. If the journal is a Submission Method D journal (journal submits) ([https://publicaccess.nih.gov/Method%20D%20Publishers]), contact the journal to clarify the submission status of the work.

Sample language to send to Method D publishers:

*Please advise as to the submission status of the following work per NIH Public Access Policy: [INSERT FULL CITATION TO THE WORK INCLUDING THE PMID].

“This work is applicable under the NIH Public Access Policy and according to your policy as noted on [INSERT URL TO JOURNAL WEBSITE] the journal will submit works to PubMed Central (PMC) on behalf of NIH-funded authors. To date, the work has not been submitted to the NIH Manuscript Submission system (NIHMS) in preparation for posting to PMC. The authors are unable to demonstrate compliance with the NIH Policy until the work is submitted.”

8. IF A NIHMSID HAS BEEN ASSIGNED, the work was published in a Submission Method C or D journal.
   a. Such works are submitted to the NIH Manuscript Submission System (NIHMS) ([http://nihms.nih.gov/]) to prepare the work for posting to PMC. They require approval steps from one of the authors before a PMCID is assigned. See NIH Submission Methods ([https://publicaccess.nih.gov/Methods-C-D-BP]) for the approval steps required.
   b. Next, find the journal policy for works by NIH-funded authors on the journal’s website. Look for “Instructions for Authors,” “Copyright information,” or any other section that might provide information about copyright policies for NIH-funded authors for that specific journal. If no information is provided, authors will need to contact the journal for clarification.
      i. Submission Method C ([https://publicaccess.nih.gov/Methods-C-D-BP]) journals allow authors to self-submit the work to PMC, or authors can request a third party to submit the work. Depending on who completed the submission, any author could be the responsible author for the approval steps. Find out who the responsible author was to avoid duplication.
      ii. Submission Method D ([https://publicaccess.nih.gov/Method%20D%20Publishers]) journals submit works to PMC on behalf of NIH-funded authors and usually assign the corresponding author. However, the PI remains responsible for completing the submission.
   c. If necessary, contact the NIHMS Help Desk to clarify the status of the work and the name of the responsible author. Include the full citation with the PMID. NIHMS will provide the current processing status of the work and the name of the responsible author for the approval steps. ([http://www.nihms.nih.gov/db/sub.cgi?page=email&from=home])
   d. If the responsible author is not timely in completing the approval steps required for a PMCID, any other author can be assigned as the responsible author. There are two methods for requesting re-assignment.
      i. Send an email to the NIHMS Help Desk ([http://www.nihms.nih.gov/db/sub.cgi?page=email&from=home]). Sample language to the NIHMS Help Desk: *Please assign me [INSERT NAME AND EMAIL ADDRESS] as the responsible author for review and approval for the following work per NIH Public Access Policy: [INSERT CITATION TO THE WORK AND PMID].*
      ii. Associated authors also have the option of clicking the “Claim Manuscript” button in the NIHMS Manuscript Summary ([http://nihms.nih.gov/help/faq.shtml#q16]).

9. Always retain copies of all emails sent. If no response is received from the journal after two emails or if the journal does not provide sufficient information about the submission status, please contact the NIH Policy Help Desk at PublicAccess@nih.gov for further guidance.
